Product characteristics

Wind resistance class 3

Beaufort 6 → 38–48 km/h → 10.5–13.4 m/s → 24–30 mph

1 designed with square posts and baseplate cover (standard)

2 adjustable post ¹⁾ manual or motor-driven

3 shadeplus, during extension ¹⁾

4 solar module sundrive, radio-controlled drop valance operation ¹⁾

LED-Line in the cassette ¹⁾

LED-Line in the guide rails ¹⁾

lighting options in the post / in the footplate cover (only rigid post) ¹⁾

support post with stabilisation box ¹⁾

5 wall sealing profile ¹⁾

¹⁾ Optional accessories

Product characteristics

Description

- Awning system with lateral guide tracks on posts, offers a projection of up to 6 metres and maximum 30 m² shading with one unit. Thanks to the tracfix cover guidance system, the sophisticated and reliable tensioning technology and its sturdy construction, the system can be used up to Beaufort 6 (wind resistance class 3).

Special features

- fully encompassing cassette that protects the cover perfectly
- tried-and-tested tensioning system with drive belts and integrated gas pistons – delivers optimum cover tension – in any phase of extension
- with tracfix system, the continuous lateral cover guidance system that leaves no gap between the cover and guide tracks
- various lighting combinations available: LED-Line RGB-WW in the guide tracks, in the cassette, in the rigid posts and LED-Line RGB-WW or LED-Uplights RGB-WW in the footplate cover of the rigid posts – fully integrated, individual lighting options for a pleasant atmosphere in the evening
- option of shadeplus – vertical protection against low-lying sun, wind and inquisitive glances integrated into the front profile, can be operated manually or solar driven by radio remote control
- systematic angular design with clean lines ensures screwless look with minimum view of technical details
- an optional telescopic post, manually operated, ensures water drainage, even at the low minimum pitch of 7°
- square posts, with screw-on footplate or stabilisation boxes for installation
- perfect in combination with markilux syncra and with optional post design 125 x 125 mm with rain gutter (on request) with vertical blinds markilux 776 tracfix, markilux 625 tracfix and markilux format triangular

Dimensions

- single unit: 122–600 cm in width, maximum extension 600 cm (depending on the width)
- maximum dimensions width × extension: 500 × 600 cm / 550 × 550 cm / 600 × 500 cm
- coupled units up to 5 fields wide are available
- intermediate sizes are available

Roller tube and lateral bearings

- round roller tube Ø 95 mm with keyway, galvanised steel – excellent stability, ensures near perfect cover performance even at the largest widths
- bearing die-cast aluminium cloth shaft

Blind profiles

- extruded aluminium, in façade quality, powder coated
- cassette profile in two pieces, angular, height × depth 160 mm × 205 mm
- angular guide tracks, 70 mm × 72 mm (coupling track 121 × 72 mm)
- front profile angular, 155 mm × 71 mm

Side caps

- the cassette end caps made of die-cast aluminium, powder coated
- guide track end caps made of die-cast aluminium, powder coated

Fixture brackets and support posts

- extruded aluminium, powder coated
- cassette holder: wall mounting, ceiling mounting, rafter mounting
- square posts 70 × 70 mm, standard height 250 cm, heights up to maximum 300 cm are available
- screw-on footplate 200 × 200 mm
- footplate cover 250 × 250 mm, height 80 mm, made of two pieces, is made of die-cast aluminium, corners rounded
- a version of the support posts with optional ballast box 600 × 600 mm x 525 mm (wxdxh), for versatile installation is available

Note: Additional information and accessory options can be found in the chapters "General information" and "markilux Accessories" in the sales manual "Designer Awnings for Conservatories, Glass Canopies and Windows".

Frame colours

markilux frame colours without a surcharge

traffic white, RAL 9016

metallic aluminium, RAL 9006

grey brown, similar to RAL 8019

off-white textured finish, 5233 ¹⁾

stone grey metallic, 5215 ¹⁾

anthracite metallic, 5204 ¹⁾

havana brown textured finish, 5229 ¹⁾

grey aluminium RAL 9007

matt iron mica DB 703

anthracite grey textured finish RAL 7016

jet black textured finish RAL 9005

Special coating

Bespoke RAL colours incur a surcharge – matt, metallic and pearl finishes as well as other colour ranges (DB, Tiger etc.) on request. At a surcharge, all frame colours are available with enhanced corrosion protection.

Colours may differ slightly from those depicted in both hue and finish. For details of the powder numbers of the frame colours see the chapter General Information

Unit with fixed posts, without shadeplus	14°	14°	14°	14°	14°
Unit with fixed posts, with shadeplus	17°	17°	17°	17°	17°
Unit with telescopic post, without / with shadeplus ¹⁾	–	7°	8°	9°	10°

In the case of markilux pergola style with a fixture width > 400 cm, there is a central water outlet in the cassette profile and in the standard front profile.

1) only when the column is fully lowered

In extreme weather conditions such as heavy rain or strong winds, water drainage cannot be guaranteed even with the appropriate pitch. In the event of an approaching thunderstorm, heavy rain or bad weather fronts, the awning must be retracted in good time. If the pitch of the awning is too low, water troughs can form when it rains which can result in damage to the awning! With the correct pitch, the markilux pergola meets the conditions of performance class 2 (rainfall 56 l/m² × h). This is the resistance to water accumulation in compliance with DIN EN 13561.

Operation	Standard	optional
crank handle	—	—
hard-wired motor	—	✓
radio-controlled motor io, 868 MHz	✓	—

Coupled awnings

2–5 fields, 1 motor per field
Alternatively 2 fields 1 motor / 3 fields 2 motors / 4 fields 2 motors
Maximum size per field: see "single unit" dimensions

General notes

Different field extensions are available in a coupled awning. The rolling up behaviour of the covers may vary in coupled awnings that have different field sizes. This does not effect the functionality of the awning or shorten the service life of the covers. The option of having telescopic posts in awnings with 3–5 fields is only available on request.

Awning cover	fabric pattern no.	standard	optional

- 1) Shadeplus cover is narrower than the awning cover
- 2) In the case of coupled awnings, available for all fields only

markilux shadeplus**Tips for selecting a shadeplus fabric**

Ideally, a shadeplus cover should be made **seamlessly** or with horizontal panels (the cover then has a **horizontal seam**) in order to achieve the best result.

Seamless fabric qualities are: sunvas oversized material and transolair series 338.. Fabric qualities with a horizontal seam are: plain fabrics from the sunvas, sunbow collections and transolair series 339.. as well as from the Soltis Perform 92 series.

Owing to the small winding diameter, the rolling up characteristics and the resulting visual appearance of the cover, shadeplus covers made with vertical seams are not recommended.

Optional accessories

adjustable posts, manual or motor-driven
posts with stabilisation boxes
shadeplus, radio remote control with solar module sundrive or manual
LED-Line RGB-WW in the guide tracks on both sides
LED-Line RGB-WW in the cassette
LED-Line RGB-WW in the posts ¹⁾
LED-Line RGB-WW / LED-Uplights in the base covers ¹⁾
infrared heater 2500 W
infrared heater 2500 W with integrated radio-controlled receiver 868 MHz radio-controlled io
wall sealing profile
several motors in a coupled awning, can be operated independently
automatic controls (sun, wind, rain)
important background information can be found in the chapter "Optional Accessories" in the sales manual "Designer Awnings for Conservatories, Glass Canopies and Windows"
rain gutter fixed permanently to posts with integrated water draining, optionally with a vertical markilux solar protection (also with a foil window) at the side and/or front ²⁾
combination with markilux syncra ²⁾
accessories for fixing with screw-in foundations ²⁾

- 1) Only available with rigid posts
- 2) Optionally available for single- and multiple-unit awnings. Price provided on request.

Lighting options

Lighting options

- 1 LED Line in the cassette ¹⁾
- 2 LED-Line in the guide tracks, on both sides ¹⁾
- 3 LED-Line in the posts, on both sides ^{1) 3)}
- 4 LED-Line in the baseplate covers, on both sides ^{1) 2) 3)}
- 5 LED-Uplights in the baseplate covers, on both sides ^{1) 2) 3)}

- 1) Can be controlled as an individual lighting group
- 2) LED-Line and LED-Uplights cannot be combined with each other
- 3) Only available for rigid posts

Controls

	standard	optional
radio-controlled io (868 MHz)	—	✓
Zigbee	—	✓

Note: When there are several lighting options, one standard control technology must be ordered per awning.

Lighting options

1, 2 and 3 LED Line in the cassette / in the guide tracks / in the posts

Technical specification

operating voltage	230 V, 50 Hz
power output per metre	11 W / m
light source	LED (24 V)
number of LEDs	144 units / m
number of transformers	1 unit
light temperature	RGB colour light change and warm white
IP protection type	IP 44
service life	approx. 15.000 h

4 LED-Line in the baseplate covers

Technical specification

Operating voltage	230 V, 50 Hz
power output per metre	8 W
Light source	LED (24 V)
number of LEDs	48 unit
Number of transformers	1 unit
light temperature	RGB colour light change and warm white
iP standard	IP 44
Service life	approx. 20.000 h

5 LED-Uplights in the baseplate covers

Technical specification

Operating voltage	230 V, 50 Hz
Power output Uplights	10 W
Light source	LED (24 V)
Number of transformers	1 unit
light temperature	RGB colour light change and warm white
IP protection type	IP 44
Service life	approx. 20.000 h

N.B!

Awning with rigid posts:

A lighting option is always delivered for all posts of the markilux pergola style.

Awning with adjustable post and rigid post:

The rigid post of the awning can only be fitted with lighting with an adjustable post - there is no lighting option for this.

LED-Line / LED-Uplights in the base covers can only be delivered for posts with standard footplate (central post).

Overview of dimensions

Eaves fixture

Eaves fixture bracket

Telescopic, motor-driven post

- Minimum post height: 1810 mm
- The awning may only be retracted or extended if the front profile is horizontal, in other words, the post must not be in the lowered position.
- The shadeplus (optional) may only be operated when the post is not in the lowered position. It may only be operated when the front profile is horizontal.

Controls	standard	optional
hard-wired motor	—	✓
radio receiver Somfy Slim Plug io (8271254)	✓	—

Technical details Hard-wired motor

power supply	230 V AC
power output	110 W
protection class	IP 44

Y = **order dimension** = distance from post centre to leading edge of front profile.
 Dimensions: min. 100 bis max. 1000 mm (standard)

dimensions in mm

01 Overview of fixture dimensions, shadeplus

02 Magnetic gearbox operation

03

08 markilux foldable crank handle

11 with magnetic gearbox attachment for manual operation of the drop valance
lengths: standard 120 cm, optional 160 cm, from 160 cm up to 280 cm on request
order no. 74271

* = extension when retracted

13 **Please note!** The shadeplus (optional) may only be operated when the post is not in the lowered position. It may only be operated when the front profile is horizontal.

14 sundrive

Solar module for radio-controlled shadeplus

Technical data solar module

voltage	max. 21 V DC
current	max. 196 mA
power output	3,2 W
protection class	IP 44
battery capacity	2200 mAh

Technical data radio-controlled motor io (868 MHz)

power supply	12 V DC
power output	26 W
protection class	IP 44

Note: A radio antenna (see illustration) is integrated in the case of operation via radio-controlled motor io sundrive. Operation side always on the left. The solar motor is not compatible with automatic control systems.

dimensions in mm

Technical details infrared heater

Overview of dimensions

Technical specification

power supply	230 V, 50 Hz, 16 A
power supply wire cross section	H05SS-F2G 3 × 1,5 mm ²
power output (per heater)	2500 Watt
length × depth × height	890 × 100 × 155 mm

Special features

- soft start function with reduced initial current surge
- cooling fins on the back prevent excessive heating of the mounting surface
- the asymmetrical reflector gives optimum heat distribution
- infrared halogen lamp with “Ultra Low Glare” heating tube technology and pleasant colour temperature
- minimum installation height 1.8 m
- minimum distance to any irradiated object 1 m

Overview of dimensions, infrared heater

One infrared heater attached to the cassette

Two infrared heaters attached to the cassette

Awning width (M)	301	351	401	451	501	551
	–	–	–	–	–	–
	350	400	450	500	550	600
a in the case of two heaters	150	175	200	225	250	275

dimensions in cm

a = infrared heater separation
M = awning width

dimensions in mm

Combination options

Examples with rain gutter and markilux 776 tracfix / 625 tracfix or markilux format triangular unit

markilux pergola style with rain gutter

Additionally with markilux format triangular unit

Additionally with markilux 776 tracfix or with markilux 625 tracfix attached to the side with markilux format triangular unit

Additionally with markilux 776 tracfix or markilux 625 tracfix at the front between the posts

Combinations available on request.

Note: Combinations not possible with adjustable post or stabilisation boxes.

Overview of dimensions

Reveal fixture of a coupled unit

N.B.! In the case of reveal fixture a distance of at least 135 mm must be left free on each side of the awning.

- M** = overall awning width = **MA** + 7 cm
- MA** = **order dimension** = awning fixture width = fixture width
- AH** = fixture height
- DH** = headroom

dimensions in mm

Motor cable exit point ¹⁾

1) depending on the operation side, left or right

- * = dimensions fixture range
- BA = width between fixture points
- EA = single unit
- M = overall awning width = $MA + 7 \text{ cm}$
- MA = **order dimension** = awning fixture width = fixture width
- MB = bracket fixture range
- SH = support post height

dimensions in mm

Calculation of the approximate fixture height, examples

Example 1: front support posts pushed as far forward as possible, $Y = 100$ mm

$ES = 100$
 $W = 15^\circ$
 $H = 6000$
 $WS = 5800$
 $Y = 100$
 $SH = 2500$
 $AHS = 1620$
 $AH = SH + AHS = 2500 + 1620 = 4120$

Example 2: front support posts pushed back, $100 \text{ mm} \leq Y \leq 1000 \text{ mm}$

$ES = 700$
 $W = 15^\circ$
 $H = 6000$
 $WS = 5200$
 $Y = 700$
 $HD = 130$
 $SH = 2500$
 $AHS = 1620$
 $AH = SH + AHS - HD = 2500 + 1620 - 130 = 3990$

ES = centre of support post to the $\leftrightarrow$ leading edge of the front profile
 W = pitch

WS = measurement from the wall $\leftrightarrow$ support post
 Y = distance front support posts can be moved back
 HD = difference from the fixture height

SH = support post height 2500 mm
 AHS = fixture height from the top edge of the support post
 AH = installation height

dimensions in mm

Calculation of the approximate fixture height

Drawing template

N.B! An on-line tool to calculate the installation measurements can be found in the protected area of the website, pro.markilux.com.
